Project Requirements

Project Requirements:

Form a team of **at most six members** and sign up for a group in Blackboard. As a major course requirement, develop a dynamic website with at least three functionalities/ features for your chosen barangay/ government/ non-government organization/ community. (Example of previous projects: a library information system for a barangay, student enrollment system for a public school, eco-tourism website for a municipal government, e-commerce website for an indigenous group, etc.) It should have the following features at the least:

- Login/ Registration page
- Admin web pages (for admin-related function/s)
- User web pages (for user-related function/s)
- Database connection (all data should be stored in the database)

You have to use HMTL, CSS, JavaScript or TypeScript, and XML (Data Files, DTD/SML, and XSLT)

Note: You must use sessions and have CRUD (create, read, update, delete) in your features.

To be submitted:

Project Proposal (Week 9)

Record a proposal video (maximum of 15 minutes) and upload to Youtube. Submit the link to the proposal video and your proposal document in Blackboard (check deadline). The proposal document should contain the following:

- Introduction (Background of the client, products/ services offered, etc.)
- Problem Statement & ObjectivesoUN SDGs Addressed
- Scope of the ProjectoFunctional/ Non-functional requirements
- Database design (ERD)
- Features of the System (include a sitemap with description, and wireframes)
- Proof of agreement of client

IMPORTANT: We will have a synchronous session on Week 9 for the approval of your client. You cannot proceed with the project unless your client has been approved.

Project Files (Week 13)

Upload the files in your myMapua OneDrive then share the link in the Group Project submission link on Blackboard. Your submission should contain the following:

- Web & database files (in .zip)
- Working Web System / Web Site uploaded on a web host

- Documentation (in PDF) – include the sections in the proposal document and add working Web site link, test results, screenshots of the functions of system (with description)
- User sign-off document (Upon approval of your proposal, a faculty mentor will be assigned to you). The team members, your client, and faculty mentor must sign the user sign-off document.

Save the documentation as groupname_doc.pdf (e.g. Philippines_doc.pdf). Save the web and database files as groupname_codes.zip (e.g. Philippines_codes.zip).

Criteria for Grading:

- Content, Features and Validation - 30%
- Design and User Interface - 15%
- Quality of Code - 15%
- Correct DB implementation- 15%
- Documentation - 25%
